Plans Announced for Summer Farmer's Day

East Lansing, May 4.—Farmers Day at the Michigan Agricultural College, made an annual event by recent action of the State Board of Agriculture, will be held on August 4, this year, according to announcement issued from the office of Dean R. S. Shaw.

Farmers Day, which takes the form of a big outdoor conference on the college campus, has been increasing in scope and popularity among Michigan farmers each year, more than 3,000 gathering for the event last summer.

The custom of holding a summer meeting started in 1918 with a special Wheat Day. The next year a Soils Day was called, and since then the meeting has been known as Farmers Day; all branches of the college agricultural division taking part in the program and exhibits.

Plans for special entertainment features are being made by the committee in charge for the Aug. 4th conference. Agricultural exhibits, including the various crop experiments growing on the college farm and the extensive M. A. C. livestock equipment, will be on display. Prominent speakers are being scheduled for the general afternoon meeting, and new features generally will be provided.

MOTHERS' DAY PROCLAMATION

Following the beautiful custom with which we have become familiar in recent years, the time has come to name a day, to be known as Mother's Day, a day whose observance shall honor the memory of our departed mothers and pay a tribute of gratitude and affection to those who are still with us. In the watchful, tender care which guided our earliest footsteps, in the constant planning for our welfare and our happiness, in the unflinching love that has blessed us all through the years up to manhood and womanhood and that still blesses and cheers us, though it be but a dear memory, in these things we find abundant reason for humble and grateful acknowledgment of the debt we owe to our mothers. The very name of mother is a synonym for love and devotion and willing sacrifice.

Therefore, by virtue of the authority vested in me as Governor of the State of Michigan, I do hereby designate and proclaim Sunday, May fourteenth, 1922, as Mother's Day, and I call upon our people, both old and young, to gather in their several places of worship and take part in services appropriate to the day.

And let the absent sons and daughters take this occasion to visit the mother in the old home, or, where such a visit is impossible, let them send a message of cheer and greeting.

In accordance with a resolution of the Congress of the United States, I further request the people of Michigan on the day aforesaid to display the United States flag in their homes and in other suitable places, as a fitting expression of their desire to pay homage to American motherhood. Given under my hand and the Great Seal of the State this Twenty-seventh day of April, in the year of our Lord one thousand nine hundred and twenty-two, and of the Commonwealth the eighty-sixth.

ALEX J. GROESBECK,
Governor.
Charles J. DeLand,
Secretary of State.

MOST SPLENDID OF AGES

Surely, in the New Era of the Last Few Years, Life is Really Worth the While.

Do you ever stop to tell yourself what a good time this is to be alive? For is it not a new era; has not life become life indeed in these last few years? The generation which has reached middle age or middle age and a half used to boast of its new world, meaning thereby a world which had made automobiles and airplanes and fast printing presses and telephones and had in turn been made by these. It was a mistaken boast, asserts the Villager. Machinery creates things, not life; the new heaven and earth which we bought in electric supply shops was merely the old, disguised for the moment under a clutter of new furniture. It takes new life to make a new world. Who today can be deaf and blind to the evidences that life is once again at the spring? Movements are afoot stirring literally half of earth's population to new offices and to vast new dreams. Contrast the age of machinery with the age of women and say which involves deeper-reaching changes in civilization! Put the age of physics beside an age in which the half of the world that is Asia is rubbing its eyes and getting to its feet, and say which is going to make deeper impress on the spirits and ways of thought of mankind! For that matter, think of the world in which there was an America busy with problems of liquor and trade, of trusts and taxes, and then think of a world in which there is an America, immense, untold, standing on tiptoe before a world adventure! Whichever way you look you must ask yourself, What will come out of it? And who can cast the horoscope? Who can, indeed, and is not this of itself a happy omen? Is it not good to be done with an age in which men were sure of everything, in which the future was made as definite as the past, in which events went by calculations, statistics, charts, diagrams, curves? What can you predict now by the charts and curves? Where are now your prophets which prophesied? No broker knows any longer how to "read the tape;" no banker can tell you just what your finance is going to take; no professor can demonstrate how the close knitting together of the nations must make war certainly impossible; no preacher is saying what religion is going to dominate the world in the next 500 years; no politician is promising what form of government will be in the ascendant when he is a little while gone. Where cocksureness ends faith begins. Yes, it is a good time to be alive!

Original Oklahoma "Boomer."
David L. Payne, original Oklahoma "boomer," started the first colony of white men in Oklahoma in 1880, before the territory had been officially opened for settlement. He was arrested and expelled from the territory, and several other attempts at settlement were prevented by government troops. Wichita was the starting point of these expeditions. He died at Wellington, Kan., in 1884.

As much as any I have kept, and as much as I love it, I love reading better, and would rather be employed in reading than in the most agreeable conversation.—Pope.

The Disciples of Christ seek to avoid taking any position in their religious life that will distinguish them from other Christians. Their deliberate aim is to occupy undenominational ground in name, faith, ordinances and life.

Whatever may be said in behalf of the wonderful history and the eternal principles of any particular denomination or of all denominations in the past centuries, certainly the time has now come when denominationalism must decrease that Christ may increase.

Technical Description. It takes a business man to describe a costume to his wife. A man of commerce, after seeing a very taking dress on a very taking young lady recently, informed the partner of his joys that: "It was blue. The dress was made of some kind of cloth, with some sort of trimming. It was a sort of lilac or shrimp pink in color. She wore one of those hats you sometimes see on women, and altogether gave an effect that I wish you could have seen."

Wonder at Fair-Haired Woman. While visitors from the West are no longer looked on with amazement and awe by the Japanese, there is one occasional type that never fails to excite interest, and that is the fair-haired woman. Not long since, a young golden-haired Scotch girl was almost responsible for a riot in the streets of Tokyo, so eager were the populace to catch a glimpse of her.
